September 19, 2006

Toronto, Ontario

### **Plant Commissioning Commences at Dominion Uranium Project**

Toronto, Ontario and Johannesburg, South Africa – sxr Uranium One Inc. (“Uranium One” or the “Corporation”) (TSX and JSE: SXR) is pleased to announce that plant commissioning has commenced at the Dominion Uranium Project, one quarter ahead of the Corporation’s previously anticipated schedule.

Plant substations and transformers were energized on August 31, 2006. The boiler is currently being commissioned and a program of commissioning the remaining plant equipment is underway. Construction of the thickeners is being completed and the first autoclave has been delivered ahead of schedule.

The crushing circuit is currently operational and will be integrated into the uranium processing circuit. The existing gold carbon in leach plant has been treating ore from Bonanza South and producing gold on a batch basis throughout 2006.

The workforce at Dominion now totals 1,300 employees with an additional 700 contractor employees engaged in construction of the plant. Recruitment and training of staff to man the plant on a permanent basis is underway.

Neal Froneman, CEO of Uranium One, commented:

“Dominion is moving smoothly towards start-up of production. The commencement of plant commissioning is a significant milestone and I am pleased to see that the team has been able to meet this milestone one quarter ahead of schedule. We remain confident that we are well on track to achieve our objective of hot commissioning in the first quarter of 2007.”

#### *About sxr Uranium One*

sxr Uranium One Inc. is a Canadian uranium and gold resource company with a primary listing on the Toronto Stock Exchange and a secondary listing on the JSE Limited (the Johannesburg stock exchange). The Corporation owns the Dominion Uranium Project in South Africa and the Honeymoon Uranium Project in South Australia, as well as a number of exploration projects. The Corporation holds an approximate 71% interest in Alease Gold Limited, which owns the Modder East gold project in South Africa. Through a joint venture with Pitchstone Exploration Ltd., the Corporation is also engaged in uranium exploration activities in the Athabasca Basin of Saskatchewan.
